

PRIMO Glide & Guide Body Wedge

PRIMO Glide & Guide Body Wedges increase patient comfort with a variety of angles and rounded wedges.

Wipe Down Body Wedges

Body wedges reliably **offload the sacrum** while maintaining a consistent 30° patient position. Wedges have a **completely wipeable surface and handles** for convenient gripping to reposition patients. Wedges are available with a classic angled edge or a rounded edge. Rounded body wedge decreases pressure on the back for **increased patient comfort**.
