QUALITY PERFORMANCE IN A NITRILE GLOVE

THE WORRY-FREE CHOICE...DESIGNED FOR USE BY EVERYONE, EVERYWHERE

STERLING SG* Sensi-Guard Nitrile Exam Gloves provide excellent fit and feel compared to latex. The new nitrile formulation provides excellent tactile sensitivity, without sacrificing any of STERLING* Nitrile’s barrier properties or durability. They also have an Acceptable Quality Level (AQL) of 1.0. That means STERLING SG* Exam Gloves are significantly less likely to have critical defects than exam gloves that just meet the ASTM 2.5 AQL requirement.

If you want to standardize on one exam glove for virtually all your needs, facility-wide, STERLING SG* Nitrile is an obvious choice.

PERFORMANCE IN A NITRILE EXAM GLOVE

Latex allergy is a concern within the healthcare industry. With STERLING SG* Nitrile Exam Gloves, Halyard Health has created a glove not made using natural rubber latex with the protection, comfort, and sensitivity of latex, at a comparable value.

The Protection of Nitrile

The Halyard patented proprietary technology boosts the tensile strength of nitrile—the force required to break through the glove—to increase its already superior barrier protection qualities.

The Tactile Sensitivity of Latex

The process also allows a reduction in glove thickness, which means that less force is required to stretch the material. That provides a nitrile glove with the dexterity and tactile sensitivity of natural rubber latex.
Other Benefits

- SMARTPULL® Box Opening – significantly reducing the incidence of getting more than one glove while dispensing
- Enhanced comfort and stretch
- STERLING SG® Nitrile Exam Gloves have an AQL of 1.0 for critical defects. This means that STERLING SG® Exam Gloves are significantly less likely to have critical defects than exam gloves that just meet the ASTM 2.5 AQL requirement

Physical Properties

Before Aging

- Tensile Strength: 35 MPa
- Ultimate Elongation: 580%

After Aging

- Tensile Strength: 38 MPa
- Ultimate Elongation: 550%

Quality Standards

No evidence of dermal irritation or contact sensitization as measured by Primary Skin Irritation, Repeat Challenge Sensitization.

Note: All specifications are subject to change without notice.

Save Space and Waste

Standard length STERLING SG® Nitrile Exam Gloves come in space saving 250 count dispenser boxes. That means up to a 60% saving in the storage space you’d usually devote to gloves. It also means fewer run-outs and replacements in use, which can help increase convenience and compliance. It also means there are fewer boxes to discard, which means less waste for your facility.

SMARTPULL® Dispenser Box

SMARTPULL® dispensing incorporates 2 separate openings on the box. The first, smaller opening is used when the box is full and helps control dispensing to lessen waste from dropped gloves or multiple dispensing. When the box is half empty, the second, larger opening allows easier access to the gloves.
