

YOU DESERVE THE RIGHT PROTECTION

PROTECT AGAINST A WIDER RANGE OF HAZARDOUS DRUGS.

The new USP <800> Guidelines make it clear: hospitals need to provide appropriate PPE for employees compounding, administering, or handling/transporting hazardous chemotherapy drugs.

CHEMO GEAR* Administration Kits make that extra protection easy - while providing you with greater peace of mind. The elements in CHEMO GEAR* kits have been extensively tested and are proven to **resist 52 hazardous chemo drugs.**

SAFELY ADMINISTERING CHEMO

The new Guidelines require nurses administering chemo treatment to wear full PPE, including a chemo gown and double gloves. The Guidelines also require changing PPE between patients to avoid chemical transfer.

Each CHEMO GEAR* Administration Kit has all the approved components nurses need to stay both compliant and comfortable while administering chemotherapy.

- Exclusive PINK UNDERGUARD* gloves make double gloving quick and easy
- Each kit prepackaged and disposable
- Clearly labeled for easy identification
- Components are latex-free
- Customizable solutions also available to fit your facility's needs

SIMPLIFYING COMPLIANCE WITH USP <800>

Complying with the new guidelines can be costly and complex. That's why CHEMO GEAR* Administration Kits contain only the essential products for this purpose — they're an affordable way to give your staff easy access to the chemo-specific PPE components they need. It's a great first step toward full compliance.

STANDARD AND CUSTOM KITS AVAILABLE

To order CHEMO GEAR* Administration Kits or kits customized for your facility's **specific needs**, talk to your Halyard representative or your Owens & Minor Distribution representative.
