

INTRODUCING HALYARD* ALGINATE WOUND DRESSINGS

PERFORMANCE. COMFORT. SAVINGS. TREAT WITH CONFIDENCE.

HALYARD* Alginate Wound Dressing is a sterile, non-woven calcium-sodium alginate dressing consisting of high strength gel alginate.

- For use on moderate-to-heavily exuding wounds and partial and full thickness wounds
- Highly absorbent, conformable and maintains structural integrity when wet
- Promote a moist wound-healing environment
- Can be used under compression
