

INTRODUCING HALYARD* GELLING FIBER WOUND DRESSINGS

PERFORMANCE. COMFORT. SAVINGS. TREAT WITH CONFIDENCE.

HALYARD* Gelling Fiber Wound Dressing is a sterile, non-woven wound dressing composed of 100% Carboxymethyl Cellulose (CMC) fibers.

- Moderate to heavy drainage, partial and full thickness wounds
- Highly absorbent and conformable
- Fibers absorb and transform exudate into soft gel that facilitates healing
- Promote removal of nonviable tissue from the wound
- Available as a pad, or ribbon
