

PROTECT SKIN. PRESERVE INTEGRITY. PROVIDE COMFORT.

NON-STINGING. FAST DRYING. DESIGNED FOR EVERYDAY CLINICAL CARE.

When skin is exposed to moisture, adhesives, friction and shear, even routine care can put patients at risk. HALYARD* No Sting Skin Barrier Film creates fast-drying, alcohol-free protection that helps safeguard vulnerable skin – without stinging and without disrupting nursing care workflow.

Available in Wands, Wipe and Spray.

An Owens & Minor (O&M) solution within the HALYARD Skin Health portfolio.*

THE CLINICAL REALITY: SKIN AT RISK

SKIN DAMAGE IS COMMON — AND OFTEN PREVENTABLE

Nurses face constant challenges protecting fragile skin in environments where moisture exposure, frequent adhesive removal and mechanical stress are unavoidable.

Common skin injuries in acute and post-acute care include:

- **MOISTURE-ASSOCIATED SKIN DAMAGE (MASD)**

Prolonged exposure to urine, stool, wound exudate or perspiration can inflame and erode skin, particularly in perineal areas, skin folds and peri-wound regions.

- **MEDICAL ADHESIVE-RELATED SKIN INJURY (MARSI)**

Repeated dressing changes, tape removal and device securement can strip the epidermis, leading to pain, tearing and delayed healing.

- **PRESSURE ULCER/INJURY (PU/I)**

Friction and shear, especially in immobile or critically ill patients, contribute to skin breakdown and ulcer formation.

Protecting skin is foundational to patient safety, comfort and outcomes.

That's why proactive protection — before damage occurs — matters.

THE SOLUTION: DESIGNED FOR THE BEDSIDE

HALYARD* NO STING SKIN BARRIER FILM

A polymeric, film-forming skin protectant that creates a transparent, breathable, waterproof barrier without stinging on application. Dries in approximately 30 seconds to support efficient care without disrupting workflow. Available in standard formats including spray, non-woven wipe and foam wand.

Why clinicians choose HALYARD* No Sting Skin Barrier Film:

NO STING, ALCOHOL-FREE FORMULATION

Supports patient comfort, even on fragile, compromised or sensitive skin

FAST DRYING — APPROXIMATELY 30 SECONDS

Allows clinicians to apply protection, secure dressings and move on without delay

EFFECTIVE, BROAD-SPECTRUM PROTECTION

Shields skin from urine, fecal incontinence, digestive enzymes, wound drainage, adhesives, friction and shear

DEMONSTRATED PERFORMANCE

Supports protection against MASD, MARSI and pressure-related skin injury in real-world clinical settings

WATERPROOF AND LONG-LASTING

Forms a durable barrier that can provide protection up to 72 hours, depending on exposure and friction

SUPPORTS WOUND AND PERI-WOUND HEALTH

Helps prevent maceration and protects surrounding skin integrity

BREATHABLE AND TRANSPARENT

Allows oxygen and moisture vapor exchange while maintaining visibility for skin assessment

COMMON CLINICAL USES INCLUDE:

- Under IV dressings and catheter securement
- Under ostomy wafers and wound dressings
- Peri-wound skin protection
- Protection from incontinence-related moisture

Product	SKU	Format	Unit Size	Case Pack
Skin Protective Barrier Film Spray	61345	Spray	28 mL	12 each/box, 12 boxes/case
Skin Protective Barrier Film Wipe	61347	Non-woven wipe	1 mL	50 each/box, 20 boxes/case
Skin Protective Barrier Film Foam Wand	61343	Foam wand	1 mL	25 each/box, 4 boxes/case
Skin Protective Barrier Film Foam Wand	61344	Foam wand	3 mL	25 each/box, 4 boxes/case

PART OF A COMPLETE SKIN HEALTH SYSTEM

ONE PRODUCT. ONE PARTNER. ONE CONTINUUM OF CARE.

HALYARD* No Sting Skin Barrier Film is part of Owens & Minor's (O&M) Integrated Skin Health Solutions, a connected portfolio designed to support skin integrity from prevention through healing.

Our Skin Health Continuum includes:

- Skin & Ostomy Care: cleansing, moisturizing and protection
- Incontinence Care: managing moisture exposure
- Pressure Redistribution: reducing pressure, friction and shear
- Patient Cleansing: efficient, infection-conscious hygiene
- Traditional & Advanced Wound Care: supporting wound healing

By addressing skin health as a system – not isolated products – O&M's trusted solutions help clinicians reduce complications, support recovery and deliver consistent care across settings.

Skin takes care. We help protect it.

Looking for other solutions that support healthy skin?

We've got you covered.

Turn to O&M for:

- Advanced wound dressings
- Incontinence management
- Patient cleansing solutions
- Pressure redistribution products

Count on O&M for reliable supply, clinical confidence and solutions designed for real-world care from prevention through healing.
