

# PATIENT CLEANSING

## BETTER BED BATHING FROM OWENS & MINOR

Replacing soap and water with a pre-dosed cleansing solution promotes good practice in infection prevention and releases valuable time to ensure the care needs of those receiving assistance are met.

### SAVE TIME AND COST

Research suggests that a waterless bathing system provides a more efficient bathing process, delivering cost and time savings.<sup>1</sup>

### REMOVE THE RISK OF REUSABLE

Disposable systems offer an alternative that overcome infection prevention and control limitations posed by reusable alternatives.<sup>2</sup>

### SUPPORTING WATER-FREE PATIENT CARE

Pioneering water-safe policies, including the removal of sinks from all patient rooms, successfully improves the control of MDR-GNB spread in ICU settings.<sup>3,4</sup>

### NO COMPROMISE ON QUALITY

Significant research suggests that washing without water is as effective as traditional methods, for the mechanical removal of bacteria and improved comfort.<sup>5,6,7</sup>

## WATERLESS BATHING SOLUTIONS

### CHG COMPATIBLE

Can be used in conjunction with CHG wipes. Our wipes do not interfere with the use of CHG products.

### REDUCES CROSS-CONTAMINATION

Use one single-use cloth per anatomical region to minimize the risk of cross-contamination and ensure effective cleansing.

### CLEANS AND MOISTURIZES

Suitable for everyday use. Developed with professional care in mind.

### RINSE FREE CARE

Rinse free care eliminates the need for toweling, while research suggest that rinse free patient care is associated with a reduction of skin colonization with GNB.<sup>3,4</sup>

### Bathing Wipes
